

COMMUNICATIONS

Building on a tradition of success

www.mmrgrp.com

MMR Communications is a single-source integrator for turnkey telecommunications projects. What makes us unique is the in-house support provided by our experienced team of estimators, engineers, project managers, certified technicians, construction and maintenance personnel.

This ultimately alleviates the need to outsource crucial areas of a major project, reducing the risk of compromised quality, schedule and budget by having more internal control over vital project areas.

MMR has served as the industry leader in electrical, instrumentation and technical services for over 50 years. With over 20 offices strategically located throughout North and South America, our personnel, quality control, on-time performance and commitment to safety is second to none.

We strive to provide our clients with exceptional value and the highest level of service and quality, while completing projects in the safest and most efficient manner possible. We invite you to experience the MMR tradition.
